

Simple savings. 39,000 gallons.

Three easy ways to embrace conservation without reservation.

Choose Faucets with Water-Saving Aerators

and save more than 14,700 gallons of water each year.

Use Water-Conserving Showerheads or Handshowers

and save over 7,700 gallons of water each year.

Install High-Efficiency Toilets (HET) and save up to 16,500 gallons of water each year.

Be bold. Make a difference. And save.

Why conserve water:

- Less than 1% of the world's freshwater supply is accessible for human use
- By the year 2013, at least 36 states in the U.S. anticipate local, regional, or statewide water shortages
- Toilets account for 25% of daily indoor water use in U.S. homes

With water-efficient products, a family of four could save 39,000 gallons of water per year. That's equivalent to:

2,000 showers

- or -

a lifetime of drinking water for 3 people

- and -

hundreds of dollars off your water bill
